10MM Thickness

Lemina surfaces is the first mosaic and subway tiles manufacturing company based in morbi, india. In to day's highly competitive market, Lemina has carved a niche by making the smallest tile humanly possible. Lemina, with its constant innovation Lemina has become the epitome of creative designs and shapes in the world of small tiles.With its unique ideas, Lemina is leading the pack when it comes to manufacturing of mosaic and subway tiles.

COCO
SERIES

Features & Advantages

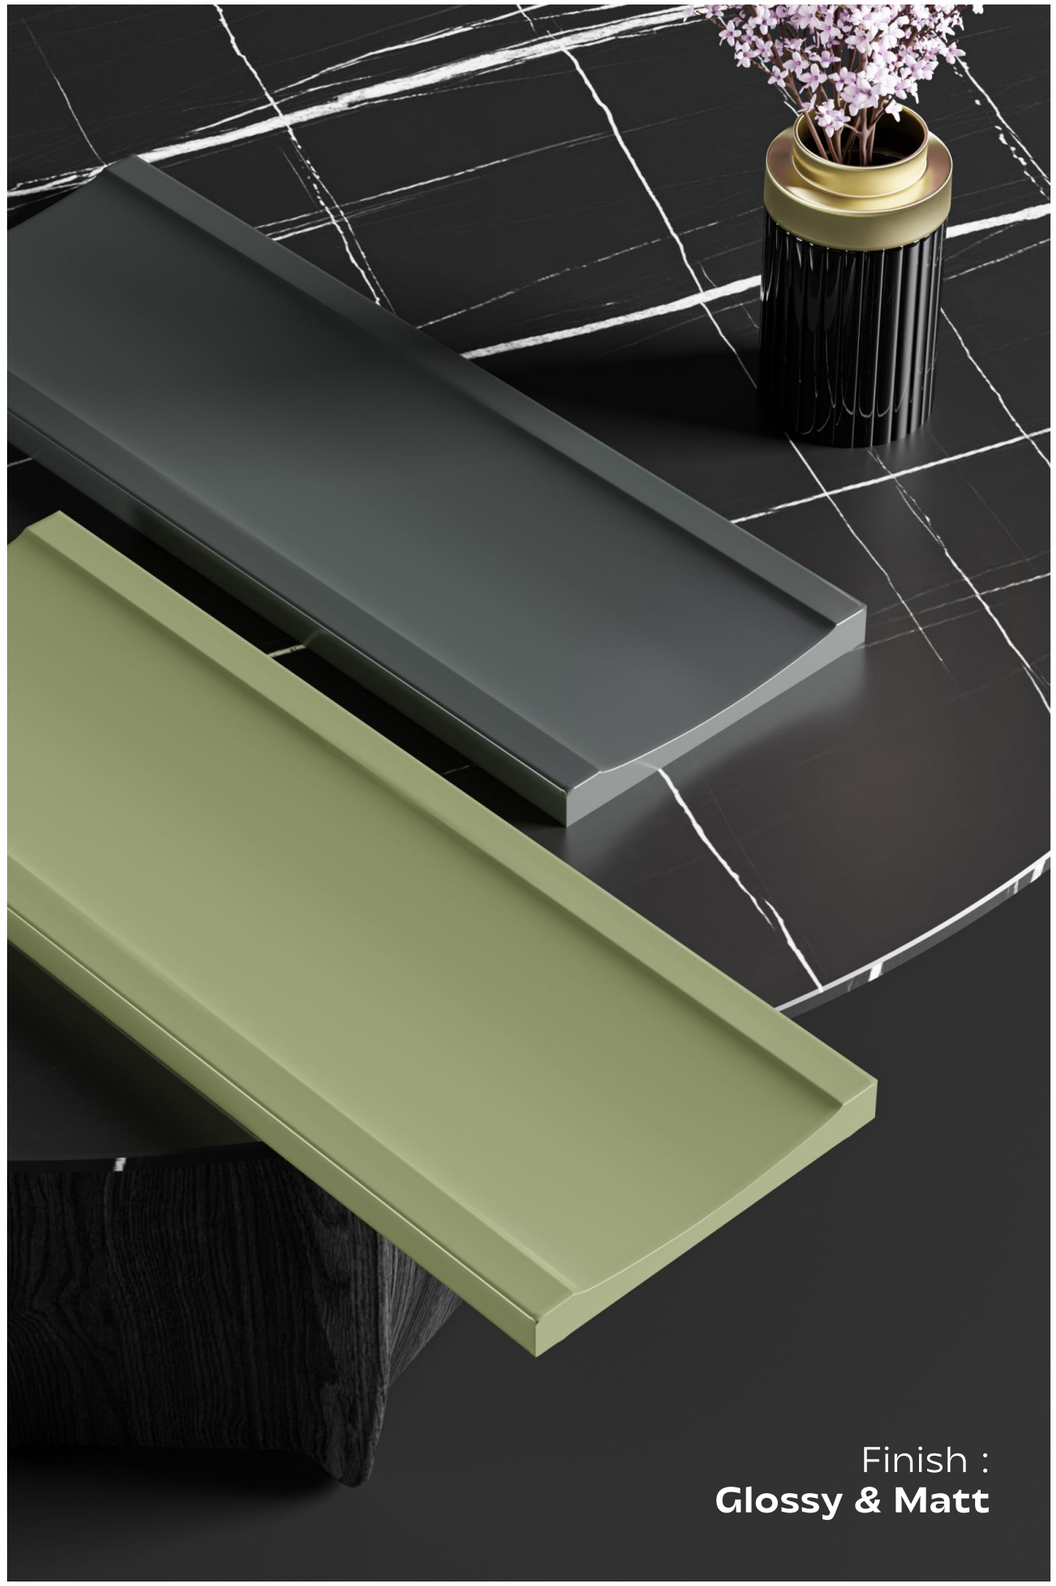

Chemical Resistance | Heat & Fire Resistance | Abrasion Resistance | High Tensile Strength | Less Water Absorption | Environment Friendly

Subway tiles are a popular choice for kitchen backsplashes, bathroom walls, and shower surrounds.This larger size can create a different aesthetic compared to the standard subway tile. It might be used in spaces where you want a more modern or bold look, as the larger dimensions can make a space feel more expansive and contemporary. These larger subway tiles can also reduce the number of grout lines, which some people prefer for easier cleaning and a sleeker appearance.
